

PECB Certified ISO/IEC 27005 Risk Manager

Master the Information Security Risk Management process based on ISO/IEC 27005 and other risk assessment methods

Why should you take this training course?

Information security threats and attacks grow and evolve constantly. As such, organizations are increasingly concerned about how their valuable information is handled and protected. The best form of defense against threats and attacks against to information security is adequate risk management conducted by qualified professionals.

ISO/IEC 27005 Risk Manager training course enables you to develop the competence to master the risk management process related to all assets of relevance for information security using the ISO/IEC 27005 standard as a reference framework. During this training course, you will also gain a thorough understanding of best practices of risk assessment methods such as OCTAVE, EBIOS, MEHARI, and harmonized TRA. This training course corresponds with the implementation process of the ISMS framework presented in the ISO/IEC 27001 standard.

After understanding all the necessary concepts of Information Security Risk Management based on ISO/IEC 27005, you can sit for the exam and apply for a "PECB Certified ISO/IEC 27005 Risk Manager" credential. By holding a PECB Risk Manager Certificate, you will be able to demonstrate that you have the necessary skills and knowledge to perform an optimal Information Security Risk Assessment and timely manage Information Security risks.

Why is this course more desirable than the others?

This training course teaches how risk assessment for information security is done by combining the information on ISO/IEC 27005 and ISO/IEC 27001. In addition to theoretical knowledge, this training course is equipped with practical exercises, quizzes, case studies, all of which make it a very engaging training course.

This training course with its probing questions and exercises will inspire you to get to know your organization in detail. When focusing on risk management for a successful ISMS, you need to be very clear on what, how, when, why you are doing, and also who will be involved. This training course aims to give you the inquisitive attitude that a good risk manager must have.

What will the certification allow you to do?

Certification is the formal recognition and proof of knowledge which plays an important role when you are entering the labor market, or when you want to advance in your career. Due to the technological advancements and the complexity of cyberattacks, the demand for professionals in information security risk assessment and managing continues to grow. As such, the ISO/IEC 27005 Risk Manager certification has become the norm for best-practice in risk assessment for information security. By obtaining a certification, you showcase a certain skill level which will display added value not only to your professional career but to your organization as well. This can help you stand out from the crowd and increase your earning potential.
